

CAT I Lab

Course Name: Internet & Web Programming
Course Code: CSE3002

Duration: 60mins
Max. Marks: 15

Write the HTML/CSS necessary to recreate the following appearance. No manual line breaks have been inserted.

The HTML text shown would appear inside the body of the page.

- The image header.gif appears once at the top-left corner of the page. This image contains the vertical "ZenGarden" text seen in the image above. Other content is shifted right by 130px to avoid covering this background image. The page's usual Zen Garden header text should not be shown because the image replaces it.
- Text on the page uses a font named "Verdana", or if that font is not available, the default sans-serif font available on the system. Text on the page is displayed in the color #471C47. The overall default font size is 9pt.
- The "A demonstration of..." paragraph's text is in italic.
- The links in the "Select Design" area are in bold. (Other links on the page are not bold.)
- There is a second column of content, 21em wide, that displays "So What is This About?" and "Participation". It has a 2px-thick border of color #471C47 and a background color of #A690AF. It touches the right edge of the first column previously described. 1em of space separates text in this area from its border on all sides. If the page is resized to be wider than shown above, the columns remain in the same orientation, connecting on their edge.
- Headings in the second column are right-aligned.
